Summary

Third-year Computer Science student at Delhi Technical Campus (GGSIPU) with a primary focus on AI/ML, backed by solid frontend development skills in React.js, TypeScript, and Tailwind CSS. Building intelligent, real-world applications using Python, Scikit-learn, and LangChain, with hands-on experience in data analysis and strong DSA fundamentals. President of the AI Renaissance (A.I.R) society and IBM-certified in AI Fundamentals and Machine Learning with Python. 3x hackathon finalist seeking opportunities at the intersection of AI and software engineering.

Education

Delhi Technical Campus – Guru Gobind Singh Indraprastha University — New Delhi, India
B.Tech, Computer Science & Engineering (3rd Year) – CGPA: 7.79/10 — *Sep 2024 – Jul 2028*

– Coursework: Data Structures & Algorithms, OOP, C/C++, Python, Web Technologies, OS, Discrete Mathematics

Kendriya Vidyalaya — India
Senior Secondary (XII) – 75% — Secondary (X) – 74% — *2022 & 2024*

Technical Skills

Languages: C, C++, Python, JavaScript, TypeScript, HTML, CSS
Frameworks & Libraries: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, React.js, Tailwind CSS, FastAPI, LangChain
Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Docker, Vercel
CS Fundamentals: DSA, OOP, REST API Design, AI/ML Fundamentals, Statistics, Data Visualization

Certifications

Machine Learning with Python (ML0101EN) – IBM / Cognitive Class (Jul 2026)
Credential ID: 139b89dd8e0f4f6d95a2bba7f1d8238e

Artificial Intelligence Fundamentals – IBM SkillsBuild (Jun 2026)
Credential ID: PLAN-7913EE1DB030

Projects

PoisonGuard – *Poisoned Dataset Detection System* | *React, FastAPI, Scikit-learn, PyTorch, Docker* | GitHub — 2026

– Contributed to an AI-driven pre-training validation pipeline that detects and isolates malicious or manipulated samples to protect ML models from data poisoning.
– Worked on a multi-layer detection engine combining statistical analysis, DBSCAN clustering, and Isolation Forest, with confidence-based anomaly scoring.
– Supported a React dashboard and FastAPI backend that visualize clean vs. suspicious samples and export a cleaned dataset.

IPL 2022 Data Analysis | *Python, Pandas, NumPy, Matplotlib, Seaborn, Jupyter* | GitHub — 2026

– Performed exploratory data analysis on all 74 IPL 2022 matches (20 attributes) covering team performance, toss decisions, batting/bowling records, and winning margins.
– Created visualizations with Matplotlib and Seaborn to surface patterns in match outcomes, top scorers, and Player of the Match trends.

IRCTC-Neo – *Modern Railway Booking Platform* | *React.js, TypeScript, Tailwind CSS, REST APIs* | GitHub — 2025

– Redesigned IRCTC's booking experience with a clean UI, improving navigation flow and reducing booking friction.
– Built core features (train search, station selection, journey filtering, seat availability) with a fully responsive, mobile-first Tailwind CSS design.

Personal Developer Portfolio | *React.js, TypeScript, Tailwind CSS, Vercel* | Live — 2025

– Built and deployed a fully responsive portfolio from scratch with dynamic routing and component-based architecture.
– Optimized for SEO and performance, achieving fast load times on Vercel's production deployment pipeline.

Experience

AI Renaissance (A.I.R) New Delhi, India
President *2026 – Present*

- Lead the AI/ML student society for the 2026–27 term, setting direction for events, workshops, and content while managing the core team.
- Coordinate members across content, design, and technical teams to deliver AI/ML learning initiatives for the student community.

AI Renaissance (A.I.R) New Delhi, India
Core Member *Sep 2025 – 2026*

- Contributed to planning and running society events and AI/ML content aimed at a broad student audience.
- Collaborated with designers and writers across teams to keep content and event execution consistent.

Smaaash Entertainment Pvt. Ltd. New Delhi, India
Campus Ambassador *Jun 2025 – Oct 2026*

- Drive brand engagement through strategic outreach, events, and peer community building on campus.

Achievements & Activities

Society Leadership: Core Member of AI Renaissance (A.I.R) in 2025; elected President for 2026–27.
3x Hackathon Finalist: Reached finals in three competitive hackathons, building full-stack and AI-powered solutions under tight time constraints.
Competitive Programming: Actively solving DSA problems on LeetCode/Codeforces – arrays, trees, graphs, DP, backtracking.
DTC × HackIndia Hackathon: Member of the organising community that conducted the AI & Web3 Builders Hackathon.
